PROJECTS

www.Claydhd.me

Portfolio website made from scratch and all host on a local webserver created by my partner. Shows all my interests, skills, and business site of my clay earring business.

<https://yinyang-33041.web.app/>

Using firebase to help host my new app called yin yang, an app to help long distance couples. This is a work in progress app that has not been released. Most features are in production. I used js, html, css, php, firebase, hack, and other technologies to create this app with the help of my partner.
